DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the graphics having the appearance of an outdoor scene recited in claim 4 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3611

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2 and 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Rossi.

Rossi discloses an amusement device comprising a base 12 having a battery compartment for a battery (Fig. 2); a housing 20 having a transparent wall and defining a viewing chamber; a fan 30, and light-weight particles 24 in the viewing chamber. It is noted that although the base is generally rectangular, the corners of the rectangle are rounded (see Fig. 1), thus giving the base “a curved exterior surface.” Further, the device has weight, which will inherently serve to return the device to an upright position if it is struck, provided it is not pushed over too far.

Regarding claim 2, the ornamental appearance of the particles is not patentably significant because it has been held that matters relating to ornamentation only, and having no mechanical function, cannot be relied on where claims are not directed to design but are structural claims. *In re Seid*, 73 USPQ 431.

Regarding claim 4, the ornamental appearance of the base and the housing is not patentably significant because it has been held that matters relating to ornamentation only, and having no mechanical function, cannot be relied on where claims are not directed to design but are structural claims. *In re Seid*, 73 USPQ 431.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rossi in view of Watkins.

Rossi discloses the invention substantially as claimed, as set forth above. However, the particles disclosed by Rossi are not luminous. Watkins teaches that it was known in the art to provide luminous particles in a free-article-movement type amusement device. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the particles disclosed by Rossi luminous, as taught by Watkins, in order to improve the aesthetic performance of the device.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
